Abstract

In our country, the educational system is three-fold: the primary education, the secondary education, and the university (tertiary) education. Primary school is compulsory and free of charge. Thus, the primary education has the highest student population. In the country where the settlement is remote and casual, it is rather difficult to build a school with five classrooms and appoint a teacher to each class. In such schools, education is carried out by only one teacher in one classroom by uniting one or more classes because of inadequate number of teachers, students and/or classrooms. These schools are called "Elementary school with united classes" and this type of education is called "Education in united classroom." This type of education gives rise to a lot of problems. The goal of this research is to explore difficulties and problems that classroom teachers come across in their teaching practice in united classes.

You need to register in order to be able to deposit eprints in the repository.

As a registered user you will be able to manage your eprints, up to the point of submitting them for Editorial Review. If the review is successful your eprint will be deposited in the repository, if it is unsuccessful it will be returned to you with editor comments.

In addition to managing your eprints a registered user can set up subscription options, so that email notifications are sent when new eprints are placed in the repository.

Please complete the details on this page to register with Ç.O.M.Ü. Bilgi Merkezi Açık Arşivi.

The registration process uses email to send you details of how to activate your account. You must then check your email and activate your password. Once activated you can start to use the registered features of the repository.

If you have already registered but have forgotten your username or password [click here](#) to set a new password.

Browsing

Browsing is a good way to access documents if you don't have a specific idea of what you're looking for. There are two ways to browse the repository, by subject and by year.

To browse the repository either select Browse from the front page or from the navigation bar at the top of the screen. Then choose which property you wish to browse by eg. "subject".
