April 2, 2010

Outline

Disciplines

OSS Research Network

IFIP Working Group on Open Source Software

Interdisciplinary Studies

Research Methods

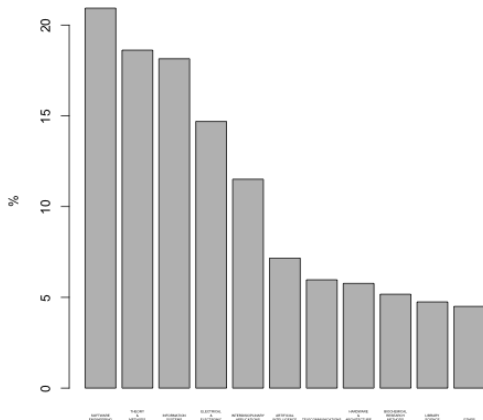

Research Languages

Research Territories

Future of OSS Academy

Research Areas

Academic Works on OSS (out of 4K)

IFIP

Aims

“To enable a diverse community of researchers and practitioners to rigorously investigate the technology, work practices, development processes, community dynamics within free, libre and open source software (OSS) systems, complementing appropriately other IFIP Working Groups where OSS is increasingly relevant.” //

Web: <http://ifipwg213.org/>

Scope: Software engineering perspective

- ▶ OSS architecture, configuration and release management, environments
- ▶ Testing and assuring OSS quality and security
- ▶ Mining and analyzing OSS project repositories
- ▶ Lessons from OSS for conventional development
- ▶ OSS and standards

Scope: Studies of OSS deployment

- ▶ Case studies of OSS deployment, migration models, success and failure
- ▶ Role of OSS in the public sector (government, education, health etc) and 'secondary' software sector (automotive, telco, medical devices etc)

Scope: Studies of OSS deployment

- ▶ OSS-compatible IT governance architectures
- ▶ Open sourcing offshore sourcing of development
- ▶ OSS applications catalog (functionality, platforms, support providers, training needs)

Interdisciplinary

- ▶ Social Antropology
- ▶ Organisation Studies
- ▶ Business Models
- ▶ Law (Lawrance Lessig, Harvard)
- ▶ Cultural Anthropology

The Cathedral & the Bazaar

Just for Fun: The Story of an Accidental Revolutionary

“I was an ugly boy.”

Research Themes

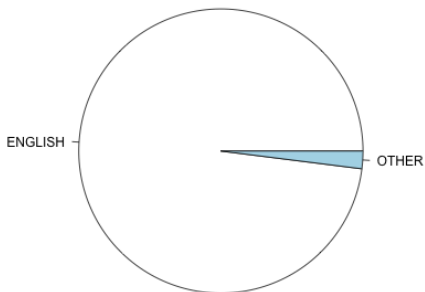

- ▶ Innovation
- ▶ User Innovation (Georg von Krogh, Switzerland)
- ▶ Collective Innovation (Eric von Hippel, MIT)
- ▶ Distributed Innovation (Bruce Kogut, UPEN)
- ▶ Governance

Methods

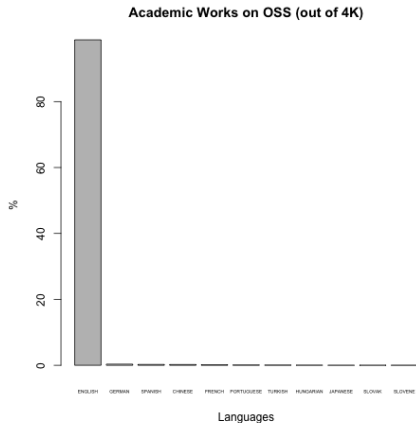

- ▶ Participant Observation
- ▶ Discourse Analysis
- ▶ Descriptive and Propositional Statistics
- ▶ Actor Network Theory (Law et.al.)
- ▶ Social Network Analysis
